Soluble Fiber Source:
Natural banana flakes

Prebiotic: Bimuno®
(Galactooligosaccharide)

HPCPS Code: B4104

Appropriate for these diets:
Gluten Free, Carbohydrate Controlled, Low Fat

Low in Lactose: 0.27 g/packet
Can be used orally or through feeding tube.

Allergen: Milk

Shelf Life: 24 months

Ordering information:

Item Number	Case UPC	Billing Code	Packaging

18475 Pineapple Banana	5-07-94688-18475-0	94688-0184-75	75/11 g packets

People who have a latex allergy also may have a risk of being allergic to fruits such as bananas, avocado, passion fruit, plums, strawberry, tomato. This is known as latex-fruit syndrome which can result in hives, sneezing, coughing, itching and which can also lead to anaphylactic reaction.

Effective for diarrhea associated with:

C. difficile, Infectious disease, Flu, Tube feeding, Chemotherapy & Radiation therapy, Antibiotics

Can be used as soon as C. diff is suspected.

Bimuno Prebiotic replenishes beneficial bacteria.^{8,9,10}

Mixes easily in water or juice.

Can be added to applesauce, pudding or yogurt.

Not for individuals with galactosemia.

Not a sole source of nutrition.

A Medical Food

Use under medical supervision.

NOT FOR PARENTERAL USE

FOR THE DIETARY MANAGEMENT OF DIARRHEA

The medicinal properties of bananas combined with Bimuno®, a 2nd generation prebiotic, gives Banatrol® Plus a unique combination of soluble fibers from banana flakes and a galactooligosaccharide prebiotic. Soluble fiber does not promote hard stools and does not slow gut motility making it safe for those with C. diff diarrhea.

The soluble fibers in banana flakes have a gel-like property that helps thicken stool consistency and a prebiotic effect the promotes reabsorption of fluid in the colon to reduce watery diarrhea. Each dose of Banatrol Plus contains Bimuno, the prebiotic Galactooligosaccharide that is a food source for the beneficial bacteria that reside in the colon or gut. It is not destroyed or digested in the stomach or small intestine, so it reaches the colon where it feeds the bacteria.

Because of its special patented process, the prebiotic Galactooligosaccharide is a uniquely sized molecule that can be digested directly by only the “good” bacteria in the gut. Banatrol Plus is specifically formulated to provide the nutrients for the dietary management of diarrhea without medication.

Dosing and Administration: Oral: 1 packet of Banatrol Plus TID (three times daily) added to beverages or foods, such as applesauce or yogurt. Maximum dose 6 packets/day with no more than 2 packets at a single time. Continue to use until diarrhea is resolved. Appropriate for continued long term use. **Tube Feeding:** 1 packet of Banatrol Plus TID every 6 to 8 hours of feeding. Add 120 mL of room temperature water to a 240 mL cup. Slowly stir in the contents of 1 packet. Mix well. Administer slowly via syringe. Flush with 30 mL water before and after administration.

When administering via feeding tube, we recommend a size 14 French or larger to reduce the risk of clogging.

For C. Diff infection (CDI): Banatrol Plus augments antibiotic therapy and does not inhibit gut motility. Banatrol Plus acts to thicken the stool and helps to reduce the bacteria load with stool elimination. Unlike anti-diarrheal medications, Banatrol Plus can be started immediately while awaiting stool test results for suspected C. diff infection.

Ingredients (Banana): Banana Flakes, Bimuno® (galactooligosaccharides, lactose, glucose, galactose). Contains Milk.

Ingredients (Pineapple Banana): Banana Flakes, Bimuno (galactooligosaccharide, lactose, glucose, galactose), Natural Pineapple Flavor, Stevia, Salt. Contains Milk.
