

# Floratrol™

Clinically Proven Prebiotic

- For the improvement and restoration of healthy gut function.

## FEATURES AND SPECIFICATIONS

Kcal/mL..... 0.085  
When mixed in 120 mL of water

### Caloric Distribution (% of kcal)

Carbohydrates..... 100%

**Prebiotic:** Bimuno®  
(Galactooligosaccharide)

### Appropriate for these diets:

Gluten Free, Low Residue,  
Carbohydrate Controlled,  
Clear Liquid, Low Fat

**Low in Lactose:** 0.35g/serving

Can be used orally or through feeding tube.

**Allergen:** Milk

**Shelf Life:** 24 months

Floratrol also contains selenium a powerful antioxidant that helps support a healthy immune system, may protect against heart disease, and plays an important role in thyroid health.

Mixes easily in water or juice. Add to applesauce, pudding or yogurt.

Not a sole source of nutrition.

**NOT FOR PARENTERAL USE**

## FOR THE DIETARY MANAGEMENT OF GI BALANCE

Prebiotics are non-digestible fibers that provide fuel for bacteria in our gut. Research suggests that an appropriate bacteria balance may have a positive impact on our immune system function, may aid in bowel regulation and improve overall intestinal balance. The prebiotic travels through the GI system intact and once it reaches the colon, starts the fermentation process. Here the good bacteria ferments, stimulating their own growth, which causes them to crowd out the bad bacteria that may already be present. This shift in population of beneficial bacterial balance helps regulate and improve overall gut function while creating a healthy microbiome.

Floratrol™ contains clinically proven Bimuno® prebiotic which selectively targets bifidobacterial. Bifidobacteria is a good bacteria that digests fiber and other complex carbohydrates that your body can't digest on its own.

Because Bimuno can be digested directly by the bifidobacterial without being broken down enzymatically first, like FOS and other prebiotics, it does not produce gas or bloating.
